12. About Dhruv Tomar

1. Brand Identity & Core Information

Brand Name	AIwithDhruv
Created By	Dhruv Tomar
Tagline	Turning AI Into Outcomes
Headline	I Don't Build Features. I Ship Entire Businesses.
Subtitle	Product, pipeline, marketing, revenue — one AI architect, zero handoffs.
Website	https://aiwithdhruv.com
Email	aiwithdhruv@gmail.com
Phone	+91 8770101822
Location	India (serving clients worldwide)
Founded	2024

AIwithDhruv is the personal brand and consulting practice of Dhruv Tomar — an AI Architect & Product Lead who builds end-to-end AI systems that run businesses autonomously. From AI voice agents and sales pipelines to browser automation and RAG systems, the brand represents production-grade AI engineering, not demos or POCs.

Core Philosophy

- Build, don't just advise — every system is shipped, deployed, and running in production
- Consultant + Engineer + Product Owner — three roles in one person
- Teach for free, build for money — content is marketing, not revenue
- Horizontal infrastructure over vertical micro-SaaS — sell the engine, not one niche app
- Open source first — 43+ published skills, community-driven growth

2. Visual Identity

Primary Color Palette

The AIwithDhruv brand uses a dark-mode-first aesthetic with cyan as the primary accent, evoking technology, intelligence, and precision. Purple and warm orange serve as secondary accents.

Cyan Primary	#00c8e8	Brand core, CTAs, glows, accents
Cyan Dark	#00a8b8	Hover states, secondary cyan
Purple Glow	#c842f5	AI/magic visual effects
Green Accent	#00ff88	Live status, success states
Warm Orange	#ff6b35	Energy, CTA highlights
Amber	#f59e0b	Warnings, warm glow effects

Background Palette (Dark Theme)

BG Primary	#0a0a0f	Page background
BG Secondary	#111118	Section backgrounds
BG Card	#16161e	Card surfaces
Navy Dark	#1a1a2e	Text color on light backgrounds

Text Colors

Text Primary	#e8e8f0	Headings, body text (dark mode)
Text Secondary	#9090a0	Subtext, descriptions
Text Muted	#78788a	Labels, timestamps
Body Text	#374151	Body text (light mode / PDFs)

Typography

Primary Font	Geist Sans (Google Fonts)
Monospace	Geist Mono
Fallback	Helvetica, Arial, sans-serif
Headings	Bold, large sizes (8xl for hero, 2xl–4xl for sections)
Body	Regular weight, 10–12pt, generous leading
PDF Documents	Helvetica family, clean white backgrounds

Visual Style Rules

- Dark-mode first — always design for dark backgrounds unless creating print/PDF
- Soft cone glows (Huly-style) — never hard-edged gradients
- Ambient grid backgrounds with 60px spacing and subtle opacity
- Glass morphism with backdrop blur on cards and overlays
- Grain overlay at 2.5% opacity for texture
- Metallic text effects for hero headings (gradient + glow)
- 3D perspective tilt cards on hover (perspective: 1000px)
- Floating particle animations with sine/cosine math
- Dhruv's photo style: always black t-shirt, glasses, cinematic lighting
- Thumbnails: dark background, purple/teal neon accents, MacBook Pro visible

3. Logo Usage & Brand Assets

Primary Logos

The AIwithDhruv logo features the brand name with a stylized AI brain circuit icon. The tagline 'Turning AI Into Outcomes' appears below the brand name. Two formats are available:

Circular Logo
Use for: profile pictures, avatars, social media icons, favicons

Square Logo
Use for: thumbnails, header images, OG images, brand cards

Dhruv Tomar — Profile Photo

Square headshot (1536×1536px)
Use for: speaker bios, about sections, social profiles, press kits.

Style: Black t-shirt, glasses, cinematic studio lighting, teal/warm ambient background.

Logo Don'ts

- Never stretch or distort the logo proportions
- Never use the logo on a busy or cluttered background without contrast overlay
- Never change the logo colors outside of the approved palette
- Never add drop shadows, 3D effects, or outlines to the logo
- Never place text too close to the logo — maintain clear space equal to the 'A' height

Brand Assets Inventory

Circular 2.0.png	Circular logo with brain icon + tagline

Square 2.0.png	Square logo with brain icon + tagline
dhruv-square.png	1536×1536 headshot (square crop)
dhruv-original.png	2752×1536 headshot (widescreen)

4. Brand Positioning & Messaging

> *"I Don't Build Features. I Ship Entire Businesses."*

Positioning Statement

AIwithDhruv is the go-to AI Architect & Product Lead for founders and businesses who need production-grade AI systems — not just prototypes. Dhruv combines deep technical expertise (LangGraph, RAG, voice AI, browser automation) with business acumen (product strategy, revenue growth, client management) to deliver AI systems that generate real revenue. He took a B2B SaaS from 0 to 10 Cr ARR, trained 2200+ engineers, and has 20+ production systems running live.

Key Differentiators

3-in-1 Operator: Consultant + Engineer + Product Owner. Companies hire 3 separate people for what Dhruv does alone.

Production, Not Demos: Every system is deployed, monitored, and running. Not a POC shop.

Zero Handoffs: End-to-end delivery: product design, engineering, marketing integration, revenue tracking.

Proven Scale: 0→10 Cr ARR growth, 218 automation workflows, 20+ live systems.

Open Source Authority: 43+ published skills, community-adopted frameworks, transparent infrastructure.

AI-Native Workflow: 26 custom AI agents, 17 MCP servers, 149 skills — the most advanced personal AI setup in the industry.

Messaging Do's and Don'ts

DO	DON'T
Say 'I built' or 'I shipped'	Say 'I can build' or 'I could build'
Lead with specific numbers and results	Use vague claims ('best in class')
Frame AI as a tool in a business system	Hype AI as magic or sentient
Show production URLs and live demos	Show mockups or Figma screenshots
Use 'production-grade' and 'autonomous'	Use 'cutting-edge' or 'revolutionary'
Reference specific tech (LangGraph, n8n, RAG)	Use generic terms ('AI-powered')

5. Social Media Presence & Links

Website	https://aiwithdhruv.com
LinkedIn	https://linkedin.com/in/aiwithdhruv
YouTube	https://youtube.com/@aiwithdhruv
GitHub	https://github.com/aiagentwithdhruv
X (Twitter)	https://x.com/aiwithdhruv
Calendly	https://calendly.com/aiwithdhruv/makeaiworkforyou
Euron (Teaching)	https://euron.one
n8n Instance	https://n8n.aiwithdhruv.cloud

LinkedIn Bio

Headline: AI Automation Engineer | I build systems that run your business while you sleep | n8n, Voice AI, Claude

LinkedIn is the primary content distribution channel. The profile emphasizes: AI Voice Agents (24/7 answering, qualifying, booking), n8n Workflow Automation (200+ production workflows), AI Chatbots (RAG pipeline, lead capture, guardrails), Full AI Sales Systems (QuotaHit.com), and Lead Generation Autopilot.

Social Media Handles (Consistent)

All platforms use **aiwithdhruv** as the handle for brand consistency. GitHub uses **aiagentwithdhruv** (legacy handle).

6. Content Strategy & Voice

Brand Voice

The AIwithDhruv voice is direct, technical, and results-oriented. It's the voice of someone who ships, not someone who theorizes. Think 'senior engineer explaining to a smart peer' — never condescending, never vague, always specific.

- **Direct:** Lead with the answer. No fluff preambles.
- **Technical but accessible:** Use real tech names (LangGraph, n8n, RAG) but explain the business impact.
- **First-person:** 'I built' framing, not 'you should build'.
- **Numbers-driven:** Always include specific metrics, costs, timelines.
- **Authentic:** Share real failures too. Not everything works first time.
- **Non-corporate:** Conversational tone. No buzzword soup.

Content Distribution Strategy

Flow: Post (hook) → First Comment (links + context) → Article (deep-dive) → YouTube (visual demo)

LinkedIn Content Mix

- **40%** — Pain point callouts — specific problems your audience faces
- **30%** — Proof/results with screenshots — show live systems, real numbers
- **20%** — Educational how-to — step-by-step breakdowns of what you built
- **10%** — Direct CTA — 'DM me AI' or link to services

Content Rules

- Always include a visual (screenshot, video, diagram) — never text-only
- Engage on 10 posts before and after publishing
- Reply to ALL comments within 2 hours
- Max 2 prompts to generate content — if it needs more, the idea isn't clear
- No content calendars — post when there's something real to share
- Add Euron CTA subtly (not every post)
- Tags/descriptions max 450 characters

Thumbnail & Visual Style

Dhruv's signature visual style for thumbnails and social graphics:

- Dark background (navy/black) with purple/teal neon accents
- Dhruv in a black t-shirt with glasses — always consistent
- MacBook Pro visible in frame (tech credibility)
- Cinematic, high-production quality lighting

- Bold text overlay with the core insight
- Hand-drawn whiteboard style for educational infographics (use handdrawn-diagram skill)

7. Products & Portfolio

Live Products

QuotaHit — quotahit.com

Autonomous AI Sales Department. 7 AI agents (Scout, Researcher, Qualifier, Outreach, Closer, Demo, Ops). Full lead-to-close pipeline. Next.js + Supabase + Inngest.

IndianWhisper — indianwhisper.com

Voice-to-Text Mac App. Community Edition. Free alternative to Wispr ($8/mo). WhisperKit-powered. Mac native app + Next.js website.

FinAI — finai.aiwithdhruv.com

Financial Document Intelligence. RAG chat, credit memo generation, PDF pipeline with pgvector. Next.js + FastAPI + OpenRouter.

FitTrack AI — fitness.aiwithdhruv.com

AI Fitness Tracker. Camera-based rep counting, food photo analysis, workout tracking. MediaPipe + Gemini.

LaptopFinder AI — laptopfinder.aiwithdhruv.com

AI Laptop Recommendations. pgvector RAG for personalized laptop matching.

Portfolio — aiwithdhruv.com

Personal Portfolio & Services. ScreenSage integrated. Next.js 16 + Tailwind v4. Premium dark design.

Open Source Projects

Ghost Browser — github.com/aiagentwithdhruv/ghost-browser

AI browser automation. 8 agents, 5 combos, 10 MCP tools. LinkedIn, Indeed, Twitter, GitHub automation. Anti-detection built in.

Claude Skills Library — github.com/aiagentwithdhruv/skills

43 published open-source skills. Install: npx skills add aiagentwithdhruv/skills

AI Coding Rules — github.com/aiagentwithdhruv/ai-coding-rules

15 production rules + 9 doc templates for AI-native full-stack development.

Multimodal RAG — github.com/aiagentwithdhruv/multimodal-rag

5-modality ingestion (text, PDF, image, audio, video). Next.js + FastAPI + Pinecone + Gemini.

Agentic Workflows — github.com/aiagentwithdhruv/agentic-workflows

WAT pattern framework for building autonomous AI workflows.

ScreenSage — Open Source

Real-time AI screen assistant with Gemini Live + screen share.

Teaching & Education

Euron Platform (euron.one) — 2200+ engineers trained across live classes on LangGraph, RAG, n8n, voice AI, and agentic systems. Currently running the 'Future-Proof AI Automation Bootcamp' (19 weeks, Sat & Sun 8–10 PM IST). Also consulting with Malavika Lakireddy on LLM Basics to AI-Native Business course.

Zero-to-Production Course (8 AI Products)

- SupportIQ — AI Support Copilot
- HireSignal — AI Interviewer (Frontend + Backend BUILT)
- DealPulse — Sales Intelligence
- LearnOS — Learning Platform
- MediCore — Medical AI
- VidSafe — Video Intelligence
- FraudLens — Fraud Detection
- KnowBase — Knowledge Copilot

8. Service Catalog & Pricing

Tier 1: Quick Wins — $500–$3,000 (3–7 days)

Service	Price Range	Details
n8n Workflow Automation	$500–$1,500	1–3 custom workflows
AI Chatbot (FAQ/Lead Capture)	$1,500–$3,000	RAG pipeline + guardrails
Email Automation Setup	$800–$2,500	Drip sequences + triggers
WhatsApp Bot Setup	$1,000–$2,500	Business API integration
Social Media Autopilot	$1,500–$3,000	Content pipeline + scheduling

Tier 2: Standard Projects — $3,000–$10,000 (1–2 weeks)

Service	Price Range	Details
AI Voice Agent + CRM	$5,000–$8,000	Vapi/Twilio + CRM integration
Full Lead Gen System	$3,000–$8,000	Scrape + score + email outreach
n8n Workflow Suite (5–10)	$5,000–$15,000	End-to-end automation
AI Sales Follow-Up Machine	$5,000–$7,000	Auto-qualify + sequence

Tier 3: Enterprise — $10,000–$50,000 (2–4 weeks)

Service	Price Range	Details
Multi-Agent AI System	$15,000–$50,000	Custom agent orchestration
AI Sales Intelligence Platform	$20,000–$50,000	Full pipeline + dashboards
Full CRM + Automation Overhaul	$15,000–$30,000	Migration + workflows
Voice AI Call Center	$10,000–$25,000	Multi-agent phone system
AI Guardrail Pipeline	$5,000–$25,000	6-layer enterprise security

Retainer Services (Monthly Recurring)

Service	Price Range	Details
n8n Maintenance + Support	$500–$2,000/mo	Monitoring + updates

Social Media Management	$2,000–$5,000/mo	Content + posting + engagement
AI Lead Gen Retainer	$2,000–$8,000/mo	Ongoing pipeline
Full AI Automation Retainer	$3,000–$10,000/mo	Dedicated AI engineer

9. Technical Stack & Infrastructure

Core Technology

Layer	Technologies
Frontend	Next.js 16, React 19, Tailwind CSS v4, TypeScript, Framer Motion
Backend	FastAPI, Python 3.12, Node.js
Database	Supabase (PostgreSQL), pgvector, Pinecone, Redis
AI/LLM	Claude (Anthropic), GPT-4o, Gemini, OpenRouter, Euri API
AI Frameworks	LangGraph, LangChain, AI SDK, RAG pipelines
Voice AI	Vapi, Twilio, Plivo, WhisperKit, Gemini Live
Automation	n8n (218 workflows), Inngest, Claude Code Skills
Browser	Playwright, Ghost Browser (custom), Puppeteer
Deployment	Vercel, AWS (ECS Fargate, S3, ALB), Modal, Docker
CI/CD	GitHub Actions, Vercel Preview Deployments
MCP Servers	17 servers (custom + cloud: Gamma, Gmail, Excalidraw)
AI Agents	26 total (12 custom + 14 GSD)
Skills	149 total (42 custom + 107 global)

AI System Architecture

The AIwithDhruv workspace runs a 3-layer system: a **Skills Layer** (149 bundled capabilities with SKILL.md + scripts), an **Orchestration Layer** (Claude makes intelligent routing decisions), and **Shared Utilities** (common infrastructure). The system follows a self-annealing loop: when errors occur, fix → test → update docs → system improves. Probabilistic AI (decision-making) is separated from deterministic code (execution) for reliability.

10. Proposal & Sales Framework

Proposal Template

Every proposal follows this structure (max 150 words):

- Open with: 'I've built exactly this before' + specific match to their problem
- Include 1 specific number or result (e.g., '31% reply rates', '60% cost reduction')
- 3-step breakdown specific to their problem (not generic)
- Timeline + investment range (never hide pricing)
- End with a question that forces a reply
- Link to portfolio proof: quotahit.com, YouTube demos, GitHub

Proof Points for Proposals

Revenue Growth	0 → 10 Cr ARR at B2B SaaS (Onsite)
Cost Reduction	60–70% cost reduction through AI automation
Email Performance	31% reply rates on cold outreach
Scale	2200+ engineers trained on Euron
Systems	20+ production systems running live
Automation	218 n8n workflows (54 active)
Open Source	43+ published skills, adopted by community

Objection Handling

- **"Too expensive"** → ROI framing: saves 20 hrs/week at $50/hr = $4K/mo savings vs $3K one-time investment
- **"We can do it ourselves"** → Speed argument: 5 days vs weeks. Plus production-grade quality from day 1.
- **"We use Zapier/Make"** → n8n advantage: 10x power, 1/3 cost, self-hosted, no vendor lock-in.
- **"Need to think about it"** → Ask specific concern to address now. Offer a free 15-min architecture call.

11. Trust Signals & Proof Points

Portfolio Statistics (Hero Section)

- **0→10 Cr ARR** — Revenue growth at Onsite B2B SaaS
- **2200+** — Engineers trained on Euron platform
- **20+** — Production AI systems shipped & running
- **43+** — Open-source skills published
- **218** — n8n automation workflows built
- **40+** — GitHub repositories (30 public)

12. About Dhruv Tomar

Dhruv Tomar is an AI Architect & Product Lead based in India, serving clients worldwide. He specializes in building production-grade AI systems that run businesses autonomously — from lead generation and sales automation to voice AI agents and browser automation.

With a track record of taking a B2B SaaS from 0 to 10 Cr ARR, training 2200+ engineers, and shipping 20+ production systems, Dhruv brings a rare combination of deep technical expertise and business acumen. He operates as a 3-in-1: consultant, engineer, and product owner.

Current Role

AI Architect & Product Lead at MSBC Group (London HQ, 22 years, 200+ engineers, $19.7M revenue). Working across FinTech (RemoraTech), Construction Safety AI (Saifety.ai), and Manufacturing ERP (DWERP) domains.

Partnerships

- **Growx Agency:** AI Consultant. End-to-end digital agency (India + International). Dhruv provides AI/tech consulting, Shikhar handles marketing/ads.
- **MensaAI:** AI Consultant for Malavika Lakireddy's AI Native Agency. Focus on international clients, $5–10K deals.
- **Euron:** AI Instructor & Consultant. Live classes, bootcamps, 2200+ learners. Teaching for free, building in public.

Personal Style

Always in a black t-shirt with glasses. Cinematic, high-production visual presence. Direct communicator who leads with results, not promises. Believes in shipping over talking, building over advising, and outcomes over features.
